DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 4-7 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by
Rudow et al US Patent Application Publication 2002/0016674.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 and 8-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rudow et al US Patent Application Publication 2002/0016674 in view of Fisher US Patent 5,507,485. Rudow discloses all of the instant application with respect to a personal digital assistant (PDA) (hand held unit paragraphs 18, 19, 60, 380, 414) with the exception of the cradle. Instead Rudow discloses a plurality of communication means that may be used to transfer information to a hand held unit, including wired and

wireless. In an analogous golf computer a display system to Fisher there is disclosed a IC card for uploading into a personal digital assistant the specifics of a golf course (see figures 1-3 and the relevant passages in the specification). The examiner contends that the cradle is used for the transfer of information and since a means is disclosed in both the Rudow and Fisher references to transfer information the specific cradle could be the IC card or any well known wired or wireless cradle used for the transfer of information such as that used by the Palm Pilot or the like. One of ordinary skill in the art would be motivated to combine the reference using the knowledge of the art that many differing types of information transfer devices may be used. It would be obvious to combine the PDA of Rudow with the PDA of Fisher and the knowledge of the use of cradles in order to transfer information between digital appliances.

Citation of Pertinent Prior Art

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Born et al '697 discloses a golf scoring computer system

Rudow et al '369 discloses a course yardage and information system

Lobsenz '109 discloses a golf scoring system

Morse '359 discloses a golf game management system

Cline '835 discloses a PDA for use with a golf game
